

Camp Mathematician!

Use your Math skills to prepare for camping fun!

Task #1 - Grab a piece of paper and some crayons or markers. Draw a picture of yourself in your camp uniform. Since you are going to Camp Mathematician, perhaps you can add patterns, numbers, and/or shapes? Be creative!

Task #2 - You will need to be prepared for Camp Mathematician! You will be there for two weeks. Make a list of all of the items you will need to bring with you. For example, how many pairs of pajamas, shorts, and socks will you need? How many items will you bring with you in total? Making a tally may help you to count faster!

Task #3 - Create a model of what your cabin will look like using popsicle sticks and a glue gun (you will need a parent to help you!) What 2D and 3D shapes can you find in your cabin? You may also wish to draw a blueprint of what your cabin looks like on the inside! Have fun!

There will be a fireworks display at Camp Mathematician on July 1st! Until then, you can see a show when you practice your Math skills in this fun game!
