

# Nature Ninja!

You are a superhero - your name is Nature Ninja!  
You love to be outdoors and are always most powerful when you're playing outside.

**Task 1: Snack Budget**  
Nature Ninjas need yummy snacks for playing outside! You have \$50 to buy snacks for the week. Using a grocery store flyer, create a shopping list for your snacks. Remember that some items are taxable, so don't forget to estimate the tax!

**Task 2: Fall Leaf Measuring**  
You'll need paper, a pencil, and a ruler. How big of a leaf can you find? Measure it by laying it flat on the ruler from stem to tip! How small of a leaf can you find? Measure that one, too!  
**Challenge:** Grab your crayons and make a rubbing of each leaf you measure. Have fun!

**Task 3: Estimation Fun** - You will need a clear plastic jar. Find some pebbles outside, and place five of them in the bottom of your jar. Estimate how many pebbles you will need to fill the jar. Find enough pebbles (around the same size) and fill your jar. How close was your estimate? You can try this activity inside also, with materials such as candy or macaroni.

Practice your Math Ninja skills with this fun game! Click the link below, then click Start to play. Now, click Play and select your grade level. Finally, click Skills to pick a topic.
