

# Lucky 7's

You will need a deck of cards-Use only cards 1(Ace)-7.

Object of the game- to learn the facts of 7

Rules- Turn all cards face down. Players take turns turning over 2 cards, if the cards total 7 (1 and 6, 2 and 5, 4 and 3) the player keeps the cards, if the cards don't make 7, turn the cards face down again. If one of the two cards you turn over is a 7, yell "Lucky 7", keep that card and choose another card to try and make 7, with the one you have left in your hand. The next player takes a turn.

Players should concentrate on where the cards are placed down, to help them find a match pair. Once all the cards have been turned over, the player with the most pairs of 7's wins. Have fun!!
