

Show Series/Movie Review

Mr. Bosma Example 1

Star Wars: The Mandalorian

Streaming on Disney +

Emerging from the dust of the destruction of the Emperor and the Empire, this show focuses on little known heroes in the Star Wars universe, the Mandalorians. The focus is on just one Mandalorian. The series The Mandalorian is on Disney Plus and is set five years after the Return of the Jedi movie and 25 years before the Force Awakens. As the biggest STAR Wars geek at Nelson Rural, I highly recommend this series as it follows a bounty hunter character who is more like a space cowboy or one man wrecking and saving (lives that is) machine, who protects the most vulnerable. Actually, due these facts even if you have never watched any Star Wars you will love this story and its action. Yes, there is baby Yoda. Even with all baby Yoda memes and songs, the green being who is rescued by the main character Mando, is the same species as the legendary Yoda, but not directly connected. There is incredible battle scenes, martial arts moves, and a multitude of twists. If you like action, suspense, strong characters and a real hero who helps those in

need and has fantastic written lines, then check this out. Star Wars fan or not I feel you will become hooked in by *The Mandalorian*.
