

Home Learning Thursday, Jan 13

Math

1. Think of all the ways you can make the number 50 and write them down. I want you to think of at least 10 different ways. Think of addition, subtraction, multiplication and even division if you are up for the challenge! Also, think about how you could draw this number using base ten blocks.
2. Find the sheet in your packet titled "Multiplication Tables - 2 to 10 Practice". Do all the easy problems first then go back and use a strategy to figure out the harder ones (draw an array, skip count, etc)
3. Work on the time worksheets in your packet. If you need a review of how to tell time on an analog clock, check out this video.
(<https://www.youtube.com/watch?v=bZY8WNMRcQ8>) Or wait for our Teams meeting at 1:00 and I can try to help you.
4. Work online on Dreambox or Boom cards. Let me know if you need your login info.

Literacy

Please read a book of your choice for at least 20 minutes. Choose an activity from the Reading Choice board in your packet.

Check out the Writing Choice Board in your packet. Choose one option and do your best writing. Remember to use lots of adjectives and to start sentences with a capital letter and end with a period, question mark or exclamation mark.

If you can be online with us at 1:00, be prepared to share your writing with the class.

Find the Sheet in your Packet called "Positive Words to Describe Me". Think of all the positive things about you! Color the person on the page to represent you.

Do something kind/helpful for a family member today. Offer to wash the dishes, fold the laundry, write a note telling someone you appreciate them, clean your room, help prepare a meal, play a game with, or read to a younger sibling. Spread a little kindness! I look forward to hearing about some of the nice things you have done!

Be sure to get active in some way today! Check out Ms Baldwin's teacher page for some workout ideas. Shovel some snow, play outside if it's not too cold.
