

Snowy BUMPI

Before you begin: Collect game pieces to use such as money, gems, small pieces of lego. Each player needs game pieces that are the same in some way. At school we use colored cubes. For example: Player 1 may have blue and player 2 red.

To Play: Roll the die. Cover the number you rolled with a game piece. If another player has a game piece on that number, you can bump them off. If you have a game piece on that number already, you can place it on top (or beside) to lock your space. That space is yours for the remainder of the game. If another player rolls a locked space/number, they miss their turn.

Keep playing until all spaces are locked. The player with the most spaces locked is the **winner**.
