Blue Bloods

By Sara Sullivan

I think Blue Bloods is worth checking out because it's a fast action show that is perfect to watch with family, and friends. It's based on a family of cops in the NYPD who are in the family business. As you watch the show you will get to see what cops and detectives must deal with every day. You will also see that being a cop isn't as easy as you think it might be, and that it's quite stressful and a hard job to do. So, next time you're looking for a new show to watch next, I would recommend watching Blue Bloods.
